Selection

The selection is based on 30-285 credits

Course Aim

Apply, critically evaluate and argue for qualitative research designs and methods relevant to occupational therapy Explain, contrast and argue for different qualitative research designs and methods in relation to scientific theoretical perspectives.

Design a qualitative data collection and analysis for a question relevant to occupational therapy, with in-depth discussion of methodological choices and ethical considerations.

Contents

Qualitative research design, including the design of qualitative studies in relation to intervention Qualitative methods for data collection and analysis
Research-ethical aspects of qualitative research designs
Scientific theoretical grounds for qualitative methodology
Gender equality and diversity perspectives in qualitative research

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The course is given using distance learning methodology, and is web-based. The studies require computer skills and internet access, as well as a headset and a webcam. The course has its pedagogical basis in LTU's pedagogical idea. This working method is founded on the idea that each student should be inspired to become engaged, as well as independent and active learning that challenges her/his abilities. The student shall actively seek out and solve problems through exploratory and critically reflective working methods. The course is read together with physiotherapy master's students with subject specialisation. The teaching is conducted through literature studies, lectures, seminars, oral and written presentations and independent project work.

Examination

Utskriftsdatum: 2024-05-14 20:07:51

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. Achievement of the course is evaluated continuously, and to obtain a passing grade the student must have fulfilled the objectives of the course. Achievement of the objectives is assessed individually in writing and orally through assignments and seminars.

The grading criteria for G (Pass) and VG (Pass with distinction) are specified in the study guide.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.
