B7002H Medical Science in Emergency Care 7,5 Hp
B7003H Medical Science in Anesthesia Care 7,5 Hp
B7004H Anaesthetic care, Practice I 7,5 Hp

Selection

Examiner

Åsa Engström

Course Aim

After successfully completing the course, the student is expected to be able to:

- systematically search scientific literature in electronic databases
- critically review and evaluate scientific studies
- formulate a scientific question in nursing
- apply ethical research principles and write a research ethics application
- plan, implement and document a scientific work in nursing in anaesthetic care
- critically review, discuss and present reasons for proposals for changes and assess other students' thesis work plus defend their own degree project (independent work).

Contents

In the course, the student will plan, implement and document a scientific work. This includes searching for and critically examining scientific literature in relevant databases in the field of nursing as well as collecting, analyzing and compiling data. The course also includes exercises and conducting opponent and respondent activities as well as applying knowledge of relevant research design and research ethics.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The course is conducted as an independent self-directed project with required academic supervision. Academic supervisors are appointed by the Department. Seminars at regular intervals that follow the work process are included in the course; attendance at the seminars is mandatory.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. The degree project is assessed via a written report which is presented at a seminar with an opponent and respondent activity.

Literature. Valid from Spring 2023 Sp 3
