Degree project in business administration, specialisation management and business development, Bachelor 15 credits E0012N

Examensarbete i företagsekonomi, specialisering ledarskap och affärsutveckling, kandidat

First cycle, E0012N

Education level	Grade scale	Subject	Subject group (SCB)
First cycle	U G VG	Företagsekonomi	Business Administration

Main field of study

Business Administration

Entry requirements

In order to meet the general entry requirements for first cycle studies you must have successfully completed upper secondary education and documented skills in English language and for admission to this course the student must also have attained at least 105 credits of the compulsory courses in years 1 and 2 for the Degree of Bachelor of Science in Business and Economics - Major: Business Administration. The following courses should be included in this and be completed entirely with at least the grade Pass: Management of business (O0017N) 7,5 credits, Strategic management (G0011N) 7,5 credits, Scientific theory, research methods and ethics (G0012N) 15 credits, Leadership in practice (E0010N) 7,5 credits, New venture creation and business planning (E0011N) 7,5 credits, Applied statistics for social scientists (G0018N) 7,5 credits or Data and analysis for business administration (G0013N) 7,5 credits, or equivalent knowledge.

Selection

The selection is based on 1-165 credits.

Course Aim

The aim of the course is for the student to practice, develop and show their ability to, in an adequate way, apply theory and method in order to solve unstructured problems relevant to activities in business administration with a specialisation in management.

Upon completion of the course the student shall be able to:

- Develop and formulate a relevant research problem from a selected subject in the area of management and business development
- Utilize scientific studies and judge their relevance for the selected problem
- Manage different, and differences between, theoretical areas
- Carry out a motivated and relevant selection of theoretical foundation for the study
- Select and motivate specific research methods for the study with understanding of the impact on the final results of the study
- Collect relevant information for the study connected to selected theory and method
- In a relevant way present the collected information in written format
- Based on selected theory and method and in scientifically correct way analyze and draw conclusions concerning the selected research problem
- Evaluate the scientific and practical relevance of the results
- Perform written communication in a linguistically and scientifically correct manner
- Orally communicate the results of the study both to scholars in the area as well as to individuals without specific knowledge in the area
- Defend the results
- Critically evaluate other studies in a constructive and scientific manner

Contents

The degree project is a thesis that is typically written by two students together. The study shall utilize a scientific approach on a problem in the area of management and business development. The study shall be presented both as a written report and in oral format. Each student shall also evaluate and perform opposition on degree project written by other students.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The format of the course is seminars and individual supervision. At the start of course the student(s) shall develop a brief written presentation and discussion of the problem area of the degree project (degree project PM). After acceptance by the supervisor this degree project PM is further developed into a research proposal. Both the degree project PM and the research proposal will be discussed at special seminars. The student(s) shall then individually or with another student as partner be guided by their supervisor to carry out the study.

The right to supervision ends at the final seminar. For students that have completed the seminar series but who have not received a passing grade on the work, there is the option to submit a revised version for assessment at later submission times without re-registration. If the seminar series has not been completed within the course session, including revisions of the work, the entire course (with all examination elements) must be redone, which can only be done by re-registration at future course sessions.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided.

In the written report the student shall demonstrate the ability to:

- Develop and formulate a relevant research problem from a selected subject in the area of management and business development
- Utilize scientific studies and judge their relevance for the selected problem
- Manage different, and differences between, theoretical areas
- Demonstrate a motivated and relevant selection of theoretical foundation for the study
- Select and motivate specific research methods for the study with understanding of impact on final result of the study
- Collect relevant information for the study connected to selected theory and method
- In a relevant way present the collected information in written format
- Based on selected theory and method and in scientifically correct way analyze and draw conclusions concerning the selected research problem
- Evaluate the scientific and practical relevance of the results
- Perform written communication in a linguistically and scientifically correct manner

In the oral presentation and opposition the student shall demonstrate the ability to:

- Orally communicate the results of the study both to scholars in the area as well as to individuals without specific knowledge in the area
- Defend the results

In the opposition the student shall demonstrate the ability to:

- Critically evaluate other studies in a constructive and scientific manner

To pass the course the student shall participate in compulsory seminars as well as register the thesis according to LTUs rules.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term “unauthorized aids” refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Remarks

Students must register for the courses themselves, or contact ETKS educational administration eduetks@ltu.se, not later than three days after the quarter commences. Failure to do so can result in the place being lost. This rule also applies to students with a guaranteed place.

Supervisors are appointed by the examiner in consultation with the course coordinator.

Luleå University of Technology does not accept cheating and plagiarism. Students suspected of being involved in any form of cheating and/or plagiarism are reported to the disciplinary board. The disciplinary measures are warning or suspension from studies for a limited time.
