SYLLABUS

Atomic and Molecular Physics 7.5 credits F7008T

Atom- och molekylfysik

Course syllabus admitted: Autumn 2023 Sp 1 - Present

DECISION DATE 2021-06-16

Atomic and Molecular Physics 7.5 credits F7008T

Atom- och molekylfysik

Second cycle, F7008T Education level

Second cycle

G U 3 4 5

Subject Fysik Subject group (SCB) Physics

Entry requirements

Basic course in Quantum Mechanics from physics or chemistry courses, for example MTF131/F0018T or Physical Chemistry.

Selection

The selection is based on 30-285 credits

Course Aim

To establish a connection between physical properties of individual atoms and molecules and their characterization by spectroscopic technique. To get acquainted with principles and methods of modern spectroscopy and its applications.

Contents

Basic concepts of quantitative description of physical properties of atoms/molecules through quantum mechanics. Their structure and interaction with electric and magnetic fields. Spectroscopic methods and their quantum mechanical origin. Energy spectra of atoms and molecules, hyperfine structure of spectra, periodic table of elements. etc. Capabilities of modern spectroscopic methods (Infra-Red, Raman, Nulear Magnetic Resonance, Fluorenscence, X-ray Emission, etc.), review of their practical applications in research, industry and medicine for studies and characterization of atomic/molecular species.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

Lectures, laboratory work and a seminar.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. Home work assignments, completed laboratory exercises and presentation at the course seminar.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Course offered by

Department of Engineering Sciences and Mathematics

Modules

Code	Description	Grade scale	Cr	Status	From period	Title
0004	Homework assignment	G U 3 4 5	4.5	Mandatory	A14	
0005	Laboratory work	G U 3 4 5	1.5	Mandatory	A21	
0006	Seminar assignment	G U 3 4 5	1.5	Mandatory	A21	

Study guidance

Study guidance for the course is to be found in our learning platform Canvas before the course starts. Students applying for single subject courses get more information in the Welcome letter. You will find the learning platform via My LTU.

Last revised
