Law for engineering students 7.5 credits J0051N

Juridik för ingenjörer

First cycle, J0051N

Education level	Grade scale	Subject	Subject group (SCB)
First cycle	U G VG	Rättsvetenskap	Law and Legal Studies

Entry requirements

In order to meet the general entry requirements for first cycle studies you must have successfully completed upper secondary education and documented skills in English language

Selection

The selection is based on final school grades or Swedish Scholastic Aptitude Test.

Course Aim

After completing the course, the student should be able to:

- Describe the basics of the Swedish judicial system's structure, systematics, and legal source materials.
- Explain the meaning of certain key legal terms and concepts in the legal areas covered by the course.
- Identify and analyze basic judicial problems in the legal areas covered by the course.
- Solve basic judicial problems in the legal areas covered by the course.

Contents

The course begins with an introduction to the sources of law and the structure of the legal system as well as an orientation in legal problem-solving methods.

Thereafter, the following areas of law are addressed:

- labor law, including the structure and function of the labor law system, with special focus on the employer's responsibility for issues concerning the work environment.
- company law, including a general review of collaborations in companies and associations of various kinds with a focus on what characterizes the various associations and how they are managed.
- contract law with a focus on larger contracts.
- intellectual property law with a focus on copyright, patent, design, company and trademark law.
- environmental law with a focus on licensing of industrial activities, including EIA.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The teaching consists of lectures and exercises. In between, the implementation is based on self-studies of course literature and specially designated material. Preparations before the exercises should as far as possible take place in groups. During the exercises, the students must present their proposed solutions as well as respond to and discuss other students' proposed solutions. The exercises are largely constructed on the basis of real cases and problems, which means that the course is structured to reflect, as far as possible, legal issues that often arise in working life.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided.

The course is examined through a written exam at the end of the course.

Grading scale U G VG.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Remarks

Students must register for the courses themselves or contact ETKS educational administration, eduetks@ltu.se no later than three days after the quarter commences. Failure to do so can result in the place being lost. This rule also applies to students with a guaranteed place.

Due to similar content, the course cannot be included in a degree together with the courses J0002N and J0003N or other courses with similar content.
