Senior Design Project in Ore Geology 7.5 credits O7016K

Projektkurs i malmgeologi

Second cycle, O7016K

Education level	Grade scale	Subject	Subject group (SCB)
Second cycle	G U 3 4 5	Malmgeologi	Earth Science and Physical Geography

Main field of study

Geosciences

Entry requirements

Decided by the examiner depending on type of project.

Selection

The selection is based on 30-285 credits

Course Aim

The goal of the course is that the student independently shall design, carry out and report a scientific project within the subject.

The student shall gather data/information and present these both written (report) and orally (presentation).

Contents

The project theme shall be chosen in cooperation with the examiner and be related to modern research and development.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The student will work independently with guidance from the examiner or an appointed supervisor. A topic is selected from discussion between the examiner and the student, and thereafter the student works independently with the topic. The topic is reported in a written report and an oral presentation.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. The course goal of design, carry out and report a scientific project is examined through a written and oral reporting of the chosen topic.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Transition terms

2500
