Course Aim

After successfully completing the course, the student is expected to be able to:

- translate key concepts in nursing care into psychiatric care
- propose, motivate, plan and evaluate nursing interventions that meet the individual needs of individuals with mental illness
- explain and motivate factors that promote recovery in individuals with mental illness
- analyze and reflect on the needs of individuals with mental illness in relation to society's resources
- identifying and meeting the needs of support from relatives of individuals with mental illness
- apply ethical concepts, principles and attitudes in relation to coercion in psychiatric care
- apply knowledge-based nursing on the basis of a clinical question with relevance for nursing in psychiatric care
- document scientifically

Contents

Conscious approach
Interventions
Recovery
Psychological and educational perspectives
Power and participation
Knowledge-based nursing
Scientific documentation and critical approach
Applicable statutes and regulations

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

Teaching and learning take place by means of self-directed independent studies, lectures, laboratory exercises, field studies, study assignments and seminars.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. The successful attainment of the objectives for the course is assessed via seminars and written reports.. The grading criteria for Pass or Pass with honors (G, VG) is stated in the Study Guide.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Remarks

The course is offered as part of a second-cycle study program in specialist training to become a nurse in psychiatric care.
