the part 0001 clinical education and training must be passed

Selection

The selection is based on 30-285 credits

Examiner

Annette Johansson

Course Aim

After successfully completing the course, the student is expected to be able to do the following based on an ethical approach:

- independently identify complex nursing needs within home healthcare for the purposes of alleviating suffering, preventing complications and promoting health from a gender equality, equal treatment and cultural perspective
- independently plan, implement and evaluate complex nursing situations within home healthcare
- diagnose medical needs and prescribe medicines according to current regulations
- manage and organize nursing within home healthcare
- collaborate with other professions
- critically reflect on the application of eHealth within home healthcare
- apply case study methodology
- apply interview and observation methodology
- document scientifically plus document care and nursing
- apply applicable relevant statutes and regulations
- show self-awareness and empathic ability
- identify the need for additional knowledge in order to continuously develop one's skills and expertise

Contents

- Palliative care in the home
- Nursing interventions for good health/ill health and illness
- Medical assessments and measures
- Leadership and collaboration within the home healthcare's teamwork delivering health care
- eHealth
- Case study methodology Interview and observation methodology
- Documentation
- Applicable statutes and regulations

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

Teaching and learning takes place by means of self-directed independent studies, application of theoretical knowledge, and a practicum/internship placement (VFU). The practicum/internship placement takes place under academic supervision. Lectures will be given in selected course sections. Attendance in laboratory sessions, seminars and the practicum/internship placement is mandatory.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. A two-grade grading scale is used for grades: Pass (G) or Fail (U). The successful attainment of the objectives for the course is assessed via an individual examination, plus the assessment of professional skills and expertise during the VFU. To receive a passing grade in the course for a full course, a passing grade is required for all parts and that the required curricular segments have been completed.

Ordinarily only one re-examination opportunity/reassignment will be allowed for the course in respect of the practicum/internship. If there are special reasons, an additional re-examination/reassignment may be granted. What is meant by "special reasons" are those reasons stated in the Regulations of the Swedish National Agency for Higher Education, HSVFS 1999:1.

Remarks

The course is offered as part of a second-cycle study program within the Specialist Nurse Program with a focus on the district nurse.

This course, which contains a curricular segment with a practicum/internship (VFU element), is encompassed within the *Special Rules for practicum/internship placements* according to the decision of the Head of Department at the Department of Health Sciences, Luleå University of Technology. Having attained an approved standard (passing grade) for the VFU curricular segment in this course constitutes a special prerequisite for courses containing a practicum/internship element.

Overlap

The course O7083H is equal to O7060H
