Course Aim

The aim with the course is that students should be able perform corporate analyses with use of company information from e.g. strategic, financial and accounting perspectives. Students should also be able to apply methods for corporate valuation.

Contents

The course includes analyses of company information from e.g. strategic, financial and accounting perspectives. The course introduces students into corporate analyses and valuation based on theoretical and practical instruments of relevance. Students work in small groups where they problematize, analyse and draw conclusions around a company case. Strategic and financial goals are for instance regarded in connection to business- and financial models. Valuation models are illustrated, tested and discussed.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.
