# Physiotherapy, Health promotion perspective from the individual to society 7.5 credits S0077H

## Fysioterapi: Hälsofrämjande perspektiv från individ till samhälle

### First cycle, S0077H

Education level	Grade scale	Subject	Subject group (SCB)
First cycle	U G VG	Fysioterapi	Therapy, Rehabilitation and Dietary Treatment

## Entry requirements

In order to meet the general entry requirements for first cycle studies you must have successfully completed upper secondary education and documented skills in English language and Basic knowledge of human anatomy, physiology, disease theory throughout the human lifespan, and knowledge of behavioural science for physiotherapy and knowledge of physiotherapy comprising 60 credits, especially regarding health promotion approaches in physiotherapy.

## Selection

The selection is based on 1-165 credits.

## Examiner

Agneta Larsson

## Course Aim

The student should on completion of the course, from a scientific foundation and with an ethical approach, be able to:

1. Describe the theoretical basis and support in social guidelines for health promotion approaches in physiotherapy at the individual, group and community level.
2. Distinguish essential factors with positive and negative effects on human health concerning children and adolescent development, leisure-time and sports, working life and aging, which are related to physiotherapy theory and practice.
3. Describe models of the health promotion approach and give application examples in physiotherapeutic intervention and interaction.
4. Give examples of how information and communication technology can be applied in health promotion work

## Contents

- Theories, models and concepts in health promotion and health promotion approaches, related to physiotherapy
- Relevant societal guidelines and policy statements at different levels
- Health factors at the population level related to child and adolescent development, leisure and sport, work and aging
- Gender aspects and key aspects of global health
- Models for intervention and implementation at the individual, group and community levels
- E-health and health-related implementation of information and communication technology

## Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

Learning in the course takes place through lectures, literature studies, group assignments, seminars and design of written reports. In all tuition forms, the student is stimulated and encouraged to carry out problem-solving and to have a critical reflective attitude.

## Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided.

- Objectives 1 and 2 are examined through a written individual examination (test 0001)
- Objectives 3 and 4 are examined with written assignments and a group seminar (test 0002)

Grading scale Fail, Pass, Pass with distinction. Criteria for grades are stated in the study guide.

## Remarks

This is a first-cycle course. Study supervision is provided in the course room in Canvas.
