

SYLLABUS

Physiotherapy: Movement and health 7.5 credits S7043H

Fysioterapi: Rörelse och hälsa

Course syllabus admitted: Autumn 2023 Sp 1 - Present

**DECISION DATE
2019-06-14**

Physiotherapy: Movement and health 7.5 credits S7043H

Fysioterapi: Rörelse och hälsa

Second cycle, S7043H

Education level	Grade scale	Subject	Subject group (SCB)
Second cycle	U G VG	Fysioterapi	Therapy, Rehabilitation and Dietary Treatment

Main field of study

Physiotherapy

Entry requirements

Bachelor in physical therapy

Selection

The selection is based on 30-285 credits

Course Aim

Explain and discuss the physiotherapeutic application of central theories, models and concepts in movement science

Objective and subjective examination methods

See correlations between movement behaviour, movement control and health in various stages of life

Provide an account of objective and subjective methods for examining movement control and movement behaviour

Discuss the scientific basis for interventions in this area

Contents

Relevant theories, models and concepts within the field of movement science

Objective and subjective measurement methods

Correlations between movement control, behaviour and health, with aspects based on individuals, groups and society

Examples of ongoing research

Deepening of knowledge of the preconditions for intervention

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The course is given using distance learning methodology, and is web-based. The studies require computer skills and internet access, as well as a headset and a webcam. The course has its pedagogical basis in LTU's pedagogical idea. This working method is founded on the idea that each student should be inspired to become engaged, as well as independent and active learning that challenges her/his abilities. The student shall actively seek out and solve problems through exploratory and critically reflective working methods. The teaching is conducted through literature studies, lectures, seminars, oral and written presentations and independent project work

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. Achievement of the course is evaluated continuously, and to obtain a passing grade the student must have fulfilled the objectives of the course. Achievement of the objectives is assessed in writing and orally through assignments, seminars and presentations.

The grading criteria for G (Pass) and VG (Pass with distinction) are specified in the study guide.

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.
