### **SYLLABUS**

# Senior Design Project in Chemical Technology 7.5 credits T7006K

Projektkurs i Kemisk teknologi

Course syllabus admitted: Autumn 2023 Sp 1 - Present

DECISION DATE **2022-02-11** 

# Senior Design Project in Chemical Technology 7.5 credits T7006K

Projektkurs i Kemisk teknologi

Second cycle, T7006K

Education levelGrade scaleSubjectSubject group (SCB)Second cycleG U 3 4 5Kemisk teknologiChemical Engineering

### Main field of study

Chemical Engineering

### **Entry requirements**

At least 90 credits in Chemical Engineering. Good knowledge in English, equivalent to English B/6. For exchange students, the examiner makes an individual examination of the qualification depending on the type of project.

### **Selection**

The selection is based on 30-285 credits

### **Course Aim**

The overall goal of the project course is that the student should be able to deal with important scientific issues in chemical separation engineering and catalysis areas.

On completion of the course, the student should be able to:

- Formulate a relevant problem for investigation within the subject area.
- Plan a project work in an efficient way.
- Design and carry out a project within the subject.
- Solve problems independently in the project
- Evaluate the results using the theoretical knowledge they learned.
- Write a scientific report, give an oral presentation and defend the conclusions.

### **Contents**

The project theme shall be chosen in cooperation with the examiner and be related to modern research and development.

Some advanced characterisation instruments, like SEM, BET and separation equipment or catalytic setup will be used.

### Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

The student will work independently with guidance.

Utskriftsdatum: 2024-05-12 03:16:03

Autumn 2023, Sp 1

### **Examination**

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided. Written report and oral presentation.

In the report and presentation, the student should show the ability to:

Senior Design Project in Chemical Technology 7.5 cr

- Collect critical information relevant to the problem formulated.
- Describe the project in a scientific manner including the project plan, design and implementation of the project as well as the results and conclusions.
- Use the theoretical knowledge they learned to discuss the results obtained.
- Give an oral presentation to present their own work.

## Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term "unauthorized aids" refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.
