Degree Project in Natural Resources Engineering, Bachelor 15 credits X0001K

Examensarbete i Naturresursteknik, kandidat

First cycle, X0001K

Education level	Grade scale	Subject	Subject group (SCB)
First cycle	U G#	Geovetenskap	Earth Science and Physical Geography

Main field of study

Natural Resources Engineering

Entry requirements

In order to meet the general entry requirements for first cycle studies you must have successfully completed upper secondary education and documented skills in English language

Selection

The selection is based on 1-165 credits.

Course Aim

After completing the course students will be able to:

- show deepened ability to independently plan and carry out a more extensive project.
- apply the knowledge and skills acquired during his/her studies.
- independently analyze and reflect on the subjects problem areas.
- present the results in a technical-scientific report and orally in Swedish or English.

Contents

Final project should be completed during the last year of the programme on a subject matter that is relevant to the area of specialization. Those who do the final project on a topic outside the specialized area must first appeal to the department.

Realization

Each course occasion's language and form is stated and appear on the course page on Luleå University of Technology's website.

For the final exam project the student shall, alone or together with another student, focus on a given task. This final project should be characteristic of a simple research project or a more advanced investigational project. The student will work independently with guidance. The final report will be given both written and orally.

Time limit for final exam work: students who begin exam work and do not finish within 15 months cannot request allowance to complete that project. The department that is responsible for the examination and supervision has no obligation to complete supervision of an exam work that goes beyond the 15 month time limit.

Examination

If there is a decision on special educational support, in accordance with the Guideline Student's rights and obligations at Luleå University of Technology, an adapted or alternative form of examination can be provided.

In order to pass exam work the student is required to complete his or her own project and in addition;

- present work in a written report
- present work in a seminar at the department
- attend at least two other student presentations

Unauthorized aids during exams and assessments

If a student, by using unauthorized aids, tries to mislead during an exam or when a study performance is to be assessed, disciplinary measures may be taken. The term “unauthorized aids” refers to aids that the teacher has not previously specified as permissible aids and that may assist in solving the examination task. This means that all aids not specified as permissible are prohibited. The Swedish version has interpretative precedence in the event of a conflict.

Remarks

In the case that the exam is carried out for an external assigner, the exam should also, apart from exceptional case, be approved by the external assigner before it can finally be approved.

Overlap

The course X0001K is equal to L0017K

Course offered by

Department of Civil, Environmental and Natural Resources Engineering

Modules

Code	Description	Grade scale	Cr	Status	From period	Title
0001	Project start, registration	U G#	0	Mandatory	A13	
0002	Written report and oral presentation	U G#	15	Mandatory	A13	Yes
