Programme content and structure

Computer graphics for game and film is a three-year education (180 credits) that leads to a Bachelor degree in Media technology with a focus on computer Graphics for game and film. The program consists of courses in the main area Media technology and a compulsory thesis project. The program includes both theoretical and practical learning that provides a broad foundation in computer graphics and the ability to be part of a team for production of computer graphics for computer games and visual filmeffects. Key areas of education are principles, methodology and design processes for creating computer graphics for film and games as well as practical application in digital tools.

For admission to the degree project course entry requirements specified in the course syllabus must be completed. Information regarding the application and admission process is given and ensured by the responsible department.

The education leads to a Degree of Bachelor as the mathematics requirement for the suffix "of Science" is not met.

Students admitted H21 to Higher Education Diploma Programme in Computer Graphics for game and film (120 credits) must, in order to fulfill the requirement for a bachelor's degree majoring in Media technology with a focus on Computer Graphics for Games and Films, take the course "Complementary course for the Higher Education Diploma Programme in Computer Graphics for game and films" of 45 credits, incl. "Degree Project in Computer Graphics, Bachelor" of 15 credits and fulfill the requirement for a university degree with a specialization in computer graphics for games and film.
