Dean of the Faculty of Science and Technology

Programme content and structure

The program consists of a total of 120 ECTS out of which 90 ECTS are courses at advanced level in the area of Computer Science. The final thesis constitutes 30 ECTS. The program is available by distance and on campus.

During the first year of the programme, you will take courses that focus on the core concept of Applied Artificial Intelligence (AI) and provide you with the appropriate knowledge to continue with more advanced and specialized courses in the second year. In particular, you will gain knowledge in programming needed for using tools within machine learning and AI, in understanding concepts of AI, machine learning, advanced deep learning and pattern recognition. You will understand how AI is connected with various different areas like business development, and healthcare.

During the second year of the programme, you will take courses in advanced data mining and how to apply AI for targeted solutions (e.g., in health, mining, business sector). There are six electable courses in the second year. Courses in the second year broaden your knowledge in the field and they prepare you for the final thesis.

Swedish for beginners is offered to overseas campus students. The course is not included in the degree and it is followed in addition to the compulsory courses.

Credits

120 credits

Degree

- Degree of Master of Science (120 credits) - Major; Computer Science and Engineering with specialisation Applied AI

Entry requirements

Academic degree of at least 180 higher education credits, of which at least 7.5 credits must include courses in programming and 7,5 credits in chemistry and also 22.5 credits in mathematics. The mathematics skills must include Calculus, Linear Algebra and one course in either Logic or in Statistics.

Good knowledge in English, equivalent to English 6

Selection

The selection procedure is based on academic qualifications, quality and quantity aspects.

Selection group

Academic: 100%

Compulsory courses

Compulsory courses 75 credits
