

SYLLABUS

STUDY YEAR 2021/2022

Master Programme in Materials Engineering

Enrollment semester Autumn 2020

DATE

2020-11-10

REFERENCE NO.

LTU-3770-2020

DECISION MAKER

Dean of the Faculty of Science and Technology

Programme content and structure

Education for the degree of Master of Science is given in conjunction with the University of Saarland (Germany), Nancy (France), Barcelona (Spain) and from 2021 also Leoben (Austria) and Padua (Italy). During the programme students spend at least one term during their second year at one of these universities.

Within the field of Materials Technology, during the first year the structure and properties of materials are covered, together with experimental methods within materials science. It is possible to choose different areas of specialisation in the form of five different electives: Advanced Metallic Materials, Polymers and Composites, High Performance Surfaces, Materials Engineering and Manufacturing Technologies, Bio/Nanomaterials. During the second year a project is completed within materials technology and material development connected to development work in cooperation with industry or within a field of current research. The last year of the programme comprises the Masters thesis. This is carried out at the university in which the student has been accepted or at the university where the student has spent the third term.

For a Masters thesis in the field of Materials Technology (120 credits) at least 90 credits comprise courses at an advanced level. Students can not combine courses Laser Material Processing (T0018T) with Material Selection & Eco Design (T0007T). The degree requires that the student spends at least one term at one cooperating university in Saarland (Germany), Nancy (France), Barcelona (Spain), Leoben (Austria) or Padua (Italy) and have completed courses at an advanced level (specially specified).

For admission to the degree project course, entry requirements specified in the course syllabus must be completed. Information regarding the application- and admission process is given and ensured by the responsible department.

Degree project can also be performed in Saarbrücken, Nancy, Barcelona, Leoben or Padua.

Swedish for beginners is offered for overseas students. The course is not included in the degree, and is read in addition to the obligatory courses.

Credits

120 credits

Degree

- Degree of Master of Science (120 credits) - Major; Materials Science and Engineering

Specialisations

Profile

- Track 1 Advanced Metallic Materials
- Track 2 Polymers and Composites
- Track 3 Smart Surfaces and Functional Materials
- Track 4 Advanced Processing Technologies
- Track 5 Bio/Nano materials

Entry requirements

Bachelors degree of minimum 180 ECTS with at least 60 ECTS in the area of mechanical engineering, material science, physics or chemistry. At least 22,5 credits in Mathematics at university level is required.

Good knowledge in English, equivalent to English B/6.

Selection

The selection procedure is based on academic qualifications, quality and quantity aspects

Selection group

Academic: 100%

Compulsory courses

Compulsory courses 60 credits

Course code	Course	Cr	Level	Comment
E7009T	Degree project in Materials Technology, Master	30	Avancerad nivå	
T0003T	Materials Technology and Materials Selection	7.5	Grundnivå	
T0004T	Material Science and Engineering I	7.5	Grundnivå	
T7001T	Deformation and Fracture	7.5	Avancerad nivå	
T7003T	Advanced Materials Characterisation Techniques	7.5	Avancerad nivå	

Profile:

Choose courses within one of five areas of specialisation

Language course/s, 7.5 credits, the choice will depend on the choice of country and prior knowledge 7.5 credits

Selective space is 7.5 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
L0005S	French for Beginners 1	7.5	Grundnivå	Selectable
L0006S	Spanish for Beginners 1	7.5	Grundnivå	Selectable
L0007S	German for Beginners 1	7.5	Grundnivå	Selectable
L0008S	Spanish for Beginners 2	7.5	Grundnivå	Selectable
L0009S	German for Beginners 2	7.5	Grundnivå	Selectable
L0028S	French for Beginners 2	7.5	Grundnivå	Selectable
S0046P	Swedish for International Students 1	3	Grundnivå	Selectable
S0047P	Swedish for International Students 2	4.5	Grundnivå	Selectable

S0046P Swedish for International Students 1, 3 credits

Non-Scandinavian students are offered the course in addition to the requirements for graduation

Course in Luleå 30 credits

Selective space is 30 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T7009T	Material Science & Engineering, project course	30	Avancerad nivå	Selectable

Or

Course at one of this places 30 credits

Selective space is 30 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
	Courses in Barcelona	30		Selectable
	Courses in Nancy	30		Selectable
	Courses in Saarbrücken	30		Selectable

Profile: Track 1 Advanced Metallic Materials

Advanced Metallic Materials: Compulsory course 7.5 credits

Selective space is 7.5 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T7008T	Phase Transformations	7.5	Avancerad nivå	Selectable

Advanced Metallic Materials: Two of the following are compulsory 15 credits

Selective space is 15 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T0007T	Material Selection & Eco Design	7.5	Grundnivå	Selectable
T7002T	Materials Modeling	7.5	Avancerad nivå	Selectable
T7004T	Surface Engineering	7.5	Avancerad nivå	Selectable
T7006T	Nanostructured Materials and Nanotechnology	7.5	Avancerad nivå	Selectable
T7028T	Metal Working	7.5	Avancerad nivå	Selectable

Profile: Track 2 Polymers and Composites

Polymers and Composites: Compulsory courses 7.5 credits

Selective space is 7.5 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T7012T	Composite Materials	7.5	Avancerad nivå	Selectable

Polymers and Composites: One of the following are compulsory 15 credits

Selective space is 15 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T0018T	Laser Material Processing	7.5	Grundnivå	Selectable
T7005T	Aerospace Materials	7.5	Avancerad nivå	Selectable
T7008T	Phase Transformations	7.5	Avancerad nivå	Selectable
T7016T	Material mechanics	7.5	Avancerad nivå	Selectable
T7029T	Composites Manufacturing and Lightweight Design	7.5	Avancerad nivå	Selectable

Profile: Track 3 Smart Surfaces and Functional Materials

Smart Surfaces and Functional Materials: Compulsory course 7.5 credits

Selective space is 7.5 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T7004T	Surface Engineering	7.5	Avancerad nivå	Selectable

Smart Surfaces and Functional Materials: One of the following are compulsory 7.5 credits

Selective space is 7.5 credits. It is mandatory to select elective courses up to the given number of credits. The given number of credits of elective courses listed must be met for degree.

Course code	Course	Cr	Level	Comment
T7008T	Phase Transformations	7.5	Avancerad nivå	Selectable
